

# React Snippets and Shortcuts

## React Component Snippets

rfce - React functional component with export

rafce - React arrow functional component with export

rcc - React class component with export

rce - React class component with export (no import React)

rfc - React functional component

rpc - React pure component

rconst - React constructor for initializing state

## React Lifecycle Methods

cdm - componentDidMount lifecycle method

cwm - componentWillMount lifecycle method (Deprecated)

cdu - componentDidUpdate lifecycle method

cwu - componentWillUnmount lifecycle method

scu - shouldComponentUpdate lifecycle method

## React Hooks

usf - React useState with functional update

us - React useState hook

ue - React useEffect hook

uef - React useEffect with cleanup function

umr - React useMemo hook

ur - React useRef hook

uc - React useCallback hook

## Prop Types

pt - Imports PropTypes and defines propTypes for a component

pts - Defines a prop of type string

ptn - Defines a prop of type number

ptb - Defines a prop of type boolean

ptf - Defines a prop of type function

pta - Defines a prop of type array

pto - Defines a prop of type object

## Redux Snippets

rsl - React Stateless Component

rsfp - React Stateless Component with props

rredux - Basic Redux setup with mapStateToProps and mapDispatchToProps

## Others

imr - Import React

imrc - Import React and Component

clg - Console log

imd - Import useDispatch from Redux

ims - Import useSelector from Redux
